PADEASE

SLOGAN: Quality Period at an Affordable Price.

Introduction

Introduction

PadEase is an online business that sells affordable women's hygiene products. The website is designed to provide customers with a simple and convenient way to purchase sanitary pads and other hygiene products online. The aim of the website is to make these essential products more accessible while offering quality products at affordable prices

Affordable Women's Hygiene Products

Organisation Overview

Organisation Name

Organisation Overview

Organisation Name

PADEASE

Brief History

PADEASE is a fictional South African organisation established to help reduce period poverty by providing affordable sanitary pads to girls and women. The organisation was founded after recognising that many learners and women miss school and work because they cannot afford menstrual hygiene products. PADEASE partners with trusted suppliers to provide high-quality sanitary products at affordable prices while also educating communities about menstrual health and hygiene. The organisation believes that every girl and woman deserves access to safe, affordable, and reliable menstrual products. The proposed website will serve as an online platform where customers can learn more about PADEASE, browse available products, place online orders, and access educational information about menstrual health.

Mission

To provide affordable, high-quality sanitary products while promoting menstrual health education and empowering girls and women throughout South Africa.

Vision

To create a South Africa where no girl or woman misses opportunities because of a lack of menstrual hygiene products.

Purpose of the Website

The purpose of PadEase is to provide an online platform where customers can browse, compare, and purchase women's hygiene products. The website is intended to save customers time by allowing them to shop from anywhere while providing clear product information, affordable prices, and a simple ordering process.

3. Website Goals and Objectives

Key Performance Indicators (KPIs)

The success of the PadEase website will be measured using the following Key Performance Indicators:

- Increase website visitors by at least 30% within the first six months.
- Receive at least 100 online orders every month.
- Increase the number of enquiries submitted through the Contact Us page.
- Increase newsletter subscriptions and returning visitors.
- Achieve high customer satisfaction through positive reviews and feedback.

Objectives

The objectives of the website are to:

- Provide affordable women's hygiene products.
- Create a user-friendly online shopping experience.
- Display product information and prices clearly.
- Allow customers to place orders online.
- Support bulk purchases for schools and organisations.

Target Audience

PadEase is designed for women of all ages, including school learners, college and university students, working women, parents purchasing for their

daughters, as well as schools and organisations that require bulk orders of hygiene products.

Current Website Analysis

PadEase is a newly established organisation and does not currently have an official website. This provides an opportunity to create a modern, responsive and user-friendly website from the beginning. The website will be designed to be simple to navigate, visually appealing and compatible with desktop computers, tablets and mobile devices. It will also load quickly and provide a secure platform where customers can confidently browse products and place orders online.

Website Description

PadEase is an e-commerce website that specialises in women's hygiene products. Customers will be able to browse available products, view prices, read product descriptions, and place orders online. The website will also provide information about delivery options, payment methods, and current special offers.

Design and User Experience

The PadEASE website will use a clean and modern design that reflects comfort, health and care. Soft pink, white and purple colours will be used because they are commonly associated with women’s health and create a welcoming appearance. The website will use Aptos font for both headings and body text to ensure readability.

The navigation menu will be placed at the top of every page, allowing users to move easily between the Home, About Us, Products, Education and Contact pages. Large images, clear headings and simple layouts will improve the overall user experience. The website will also be responsive, meaning it will display correctly on desktops, tablets and smartphones.

Low-Fidelity Wireframe

HIERARCHY CHART

Technical Requirements

The website will be developed using HTML5 to create the structure of each web page. CSS3 will be used to improve the appearance of the website by adding colours, fonts and page layouts. JavaScript will be implemented to provide interactive features such as form validation and user interaction. The website will be created using Visual Studio Code and managed through GitHub for version control. A domain name such as www.padease.co.za and reliable web hosting services will be required before the website is published online.

Timeline and Milestones

Week	Activity
Week 1	Research and planning
Week 2	Create HTML pages
Week 3	Apply CSS styling
Week 4	Add JavaScript functionality

Week	Activity
Week 5	Test and improve the website
Week 6	Final review and submission

Budget

Item	Estimated Cost
Domain Name	R250 per year
Web Hosting	R1 200 per year
Website Development	R6 000
Website Maintenance	R500 per mo

Website Pages

The website will consist of the following pages:

- Home
- About Us
- Products
- Special Offers
- Order Online
- Payment Options
- Delivery Information
- Bulk Orders
- Contact Us

Each page has a specific purpose and is designed to help customers easily find information and complete their purchases.

How the Website Works

Customers will visit the PadEase website and browse the available hygiene products. After selecting the products they wish to purchase, they will add them to their shopping cart and proceed to the checkout page. The customer will then provide their delivery information, choose a payment method, and confirm the order. Once the order has been processed, the products will be prepared and delivered to the customer's chosen address.

Benefits of the Website

The website provides customers with an easy and convenient shopping experience. It allows users to compare products, view affordable prices, and place orders from the comfort of their homes. The website also supports bulk orders, making it useful for schools and organisations. Its simple layout makes it easy to use on computers, tablets, and mobile phones.

Conclusion

PadEase is a practical online business that aims to provide affordable women's hygiene products through a simple and user-friendly website. By offering quality products, convenient online ordering, and reliable customer service, the website will help make essential hygiene products more accessible to individuals, schools, and organisations.

This is the kind of proposal that is appropriate for a first-year web development assignment. It is professional, easy to read, and provides a solid foundation for the HTML website you will create in Visual Studio Code.
